Dear Parent /Carer

As you are aware our school subscribes to an amazing online mathematics program, that allows children to deepen their understanding of concepts detailed in the Curriculum.

**Today the children have been given their log-ins to encourage them to go on the website out of school hours; to further develop what we are doing in school.**

*Maths is a skill that can be developed both in school and at home, and can be made fun and engaging, even as part of a child's everyday play.*

The site can be accessed through most electronic devices (including the app) going through Google Chrome has been recommended.

**Please encourage your child to engage with the fun and educational activities this program has to offer.**

**Your child's teacher will be accessing their data to monitor participation.**

**Many thanks and enjoy!!**
